UI MORPH LOOP SKILL

Your UI states in. A seamless one-shape motion loop out.

AI UNLEASHED

SKILLS BY FER PATEL · FERPATEL.AI

1 INSTALL

Claude: Customize > Skills > + > Upload a skill. **Upload the fp-ui-morph-loop ZIP and enable it.**

Claude Code: unzip it into `~/.claude/skills/`, then run `/fp-ui-morph-loop`.

2 USE

Bring your product's name, URL or screenshots, the 8-12 moments you want in story order, and the real labels and numbers inside each one.

Say: "Use fp-ui-morph-loop to make a looping motion piece from my app's UI."

INPUT

`app_screens.png`

YOUR UI

Product URL or screenshots

8-12 states in order

Real labels and numbers

Real copy, never invented metrics.

skill builds

THE OUTPUT

TOGGLE · TABS · CHART

THE WORKFLOW

1. **GATHER** — Real components, colours and copy.
2. **PLAN** — States on the beat grid. Approve first.
3. **BUILD** — Brand, grid and story in the template.
4. **PREVIEW** — One frame per beat, every tile read.
5. **RENDER** — Motion blur and an exact loop check.
6. **DELIVER** — UI sounds mixed, mastered, all aspects.

ONE SHAPE, NEVER CUT

A single rounded rectangle plays every part, and the last state equals the first.

SOUND: SYNTHESIZED OR YOURS

Clicks, pops, ticks and a chime on success. Music only if you bring a track.

Needs: Runs in Claude Code or a Claude app with local code execution. Needs Node.js 18+, Python 3 with numpy, and ffmpeg.

Created by and Licensed by Fer Patel and AI Unleashed.

EXAMPLES WHAT TO SAY, WHAT YOU GET

UI Morph Loop: three ways to use it. Copy the "Say" line and change the details to yours.

AI UNLEASHED

SKILLS BY FER PATEL · FERPATEL.AI

BEST USED FOR Landing page heroes | Launch teasers | Dribbble shots | App social posts | UI motion loops

1 LANDING PAGE HERO LOOP

YOU BRING

Screenshots of your app, 10 states in story order, and the real copy in each

SAY

"Use fp-ui-morph-loop with the screenshots in app_screens/ of my invoicing app: 10 states from sign in to the paid check and revenue chart, 16:9 for the homepage hero."

YOU GET

A 14 s 16:9 MP4 at 1920 x 1080 that loops exactly back to frame one, using your real labels and numbers, with the loop seam checked.

2 LAUNCH TEASER REEL

YOU BRING

Your product URL, the states you want, and a launch track around 120 BPM

SAY

"Use fp-ui-morph-loop on our app's URL for a 9:16 launch teaser set to launch_track.mp3: 9 states from sign up to the first report, real copy only."

YOU GET

A 9:16 loop at 1080 x 1920 on your track's measured beat, starting on a downbeat, with a click on every press and a pop on every morph.

3 DRIBBBLE COMPONENT SHOT

YOU BRING

Your design system's components, colours and font

SAY

"Use fp-ui-morph-loop for a square Dribbble shot of our components: button, loader, toggle, slider, tabs, command palette, toast, back to button. Colours in tokens.json."

YOU GET

A 1:1 MP4 at 1440 x 1440, 60 fps on request, one rounded shape morphing through each component with synthesized clicks, ticks and a chime.

MAKE IT YOURS

Swap in your own files, length and platform. The more specific your ask, the closer the first version.

NOT FOR

Not for a full narrated product tour with features and captions (use fp-product-video).

Needs: Runs in Claude Code or a Claude app with local code execution. Needs Node.js 18+, Python 3 with numpy, and ffmpeg.
